

JAMIE BECKWITH[®]

COLLECTION

JAMIE BECKWITH COLLECTION[®] LINE ON SUSTAINABILITY ENIGMA[®], PROJECTION[™], MOSAIC & ETCHED LINES

Nature is our primary inspiration.

The Jamie Beckwith Collection[®] strives to create luxurious, timeless and functional environments while being good stewards of the planet in order to preserve it for future generations.

Enigma and Etched:

The Enigma[®] and Etched lines are engineered hardwood products that significantly reduces raw material waste. The collections are manufactured using a computer numeric controlled (CNC) milling process, which virtually eliminates wood and energy waste while ensuring that each piece is produced with the utmost precision and quality. Our patterns are then treated with an oil-based, no VOC stain by Rubio[®] Monocoat.

Projection[™] and Mosaic:

The adhesive utilized in our “split block” options under the Projection[™] and Mosaic lines were designed to reduce emissions without the loss of manufacturing efficiency or bond quality. The products do not contain any Formaldehyde and will exhibit zero VOC emissions in its final cured state. We use only oil-based stains with no VOC emissions from Rubio[®] Monocoat for Projection[™] and Mosaic.

Thinking Regionally:

The Jamie Beckwith Collection[®] is located in Nashville, TN where all our products are manufactured under one roof. We operate as a tight-knit family with respect to the environment and each other. All of our wood is sourced regionally, from neighboring states. We offer both FSC-Certified and reclaimed options for all of our collections.

Earning LEED CREDITS:

Our Collections offer high quality products that are built with durability, strength and stability while helping to earn LEED certification through the following credits:

- LEED 2009 NC/CI MR Credit 5 - Regional Material
- LEED 2009 NC/CI IEQ Credits 4.1-4.4 - Low-emitting finishes
- LEED NC MR Credit 3/CI MR Credit 4 - Recycled Content
- LEED NC/CI MR Credit 7 - Certified Wood Products
