

JAMIE BECKWITH®
COLLECTION

Projection

PROJECTION adds depth and dimension to your walls, with a series of end grain wood blocks, in several depths, that can be combined at random or in calculated patterns. Imagine the play of light and shadow, the tactile quality, the warmth of wood, with Projection® gracing your walls. No longer a simple backdrop for art, your walls become the feature in your space. Rustic and Wedge come in 5 wood species while Linear is offered in only 1. All 3 has 6 different finishing options available. Our product is made in Nashville, Tennessee and can be customized to meet client's specific needs.

Specifications

- Rubio Monocoat's Hard Oil Plus 2C Finish no VOC (option to order unfinished)
- Glue-up installation
- 4-8 week lead time

Product Usage Recommendations

- Suitable for residential and commercial vertical surfaces
- Not recommended for areas with water exposure such as the interiors of baths and showers
- Not suitable for outdoor applications

Installation and Maintenance

- Allow approximately 5-7 days of acclimation
- Loctite Adhesive or Bostik's Best Adhesive recommended
- Paint substrate surface black to reduce the appearance of any minor gaps; this is normal and to be expected
- Tiles can be cut with a quality chop saw or other finish saw
- Dust or brush regularly. Visit Rubio Monocoat's website for finish maintenance instructions & products
- Maintain humidity level between 35-65%
- Inspect order upon receiving; product is non-returnable once installed
